WEB SITE DEVELOPER

4+ years of professional web site development and design.

Detail-oriented web site developer focused on user experience and efficient functionality.

EXPERTISE

- » Proficient in PHP & MySQL, HTML, CSS, JavaScript & JQuery, Adobe Creative Cloud, and Java.
- » Highly organized individual able to handle multiple tasks simultaneously.
- » Efficient and accurate at delivering time-sensitive materials.
- » Passionate about learning new technologies and programming languages.

PROFESSIONAL EXPERIENCE

Web Developer & Graphic Support, Global-5 Inc., Longwood, FL, October 2016 – Present

Responsible for assisting in graphic support including web site creation and maintenance, handout and poster board layout design, detailed maps for public outreach, and other graphical needs. Also responsible for front and back end web programming. Responsible for creating entire WordPress themes, and many smaller web applications.

Featured Projects:

- » Full creation of web sites (I4Beyond.com, FloridaMCORES.com)
 - Fully custom WordPress themes as well as detailed interactive maps.
- » Elaborate interactive map (I4Ultimate.com/construction-map)
 - Displays construction alerts, construction photos, live video feeds, current interchange configurations, and much more. Visit the link above to play around with the map.
- » Alert System (FDOTRoads.com, login required, screenshots: williamreithmeyer.com/fdotroads)
 - Developed with PHP with MySQL, designed for any user. The alert system is to be used to input road closures at specific locations, specific lanes to be closed, and more. User experience was top priority for this project.
- » Construction Alert Conflict Map
(Part of FDOTRoads.com, screenshots: williamreithmeyer.com/conflict)
 - Developed with PHP and JavaScript. Given a feed of construction alerts (JSON), I created a system to show conflicts by drawing circles on the map per alert and capturing collisions.
- » Inventory Management System (screenshots: williamreithmeyer.com/IMS)
 - Developed with PHP with MySQL, the inventory system handles re-stocking requests from authorized outsiders.
